EXPERIENCE

WOW Infotech Pvt. Ltd. - Jr. Flutter Developer

April 2025 – Present

Nashik

- Contributing to the development of high-quality Flutter applications in a team environment.
- Learning and applying advanced architectural patterns including MVC and MVVM for scalable development.
- Exploring and integrating modern state management solutions like Riverpod and BLoC.
- Collaborating with designers and backend developers to ensure seamless API integration and UI/UX consistency.
- Actively involved in both self-driven projects and collaborative modules, focusing on clean code practices and performance optimization.

FlyCT SoftTech - Flutter Developer

July 2024 – Feb 2024

Nashik

- Developed feature-rich Android and iOS apps using Flutter and Dart.
- Collaborated with designers, back-end teams, and product managers for seamless execution.
- Used GetX and Provider for state management and scalable codebases.
- Integrated third-party APIs (e.g., Google Maps, social logins, real-time updates). Worked with SQLite and Firebase for local and cloud data storage.
- Published apps on Google Play and App Store, adhering to platform standards. Created custom widgets and responsive designs for various device sizes.

Solace Infotech Pvt. Ltd. - Trainee Software Consultant

Jan 2024 – June 2024

Nashik

- Worked on Flutter application development tasks, developing apps using Flutter, Dart, and Firebase.
- Participated in the full app development lifecycle, from concept and design to testing and deployment.
- Worked closely with senior developers to write clean, efficient, and maintainable code in Dart.
- Developed robust Bluetooth connectivity features, enabling seamless pairing and communication with devices.
- Integrated real-time graphs to visualize dynamic data effectively.

PROJECTS
